Power Cords - Thermoset Rubber (In Stock) RoHS Compliant

Retracted Lengths 48", 36", 30", 24", 18", 12" Extended Lengths 1:5 Ratio 90deg C UL/CSA

When rugged duty in an industrial environment is a requirement, choose thermoset rubber retractile cords. Available as light duty SVO types, medium duty SJ00W types and heavy duty SOOW types.

Soft Bare Copper TPE Jacket - Black

Color Code - See Chart #2

Tangent Leads - Cut Blunt - 12" long on 12" retracted lengths, 6" long on others unless otherwise specified.

Options Available:

- Special retracted lengths - 240" retracted maximum – 100 ft extended maximum
- Special lead lengths
- NEMA 5-15P Plug (100 pcs minimum)
- Jacket removal and stripping of conductors

Power Cords - TPE (In Stock) RoHS Compliant

Retracted Lengths 48", 36", 24", 12" Extended Lengths 1:5 Ratio 105deg C UL/CSA

Coiled cords made with TPE, a thermoplastic elastomer with rubber like qualities, offer good mid-range performance at reasonable cost and are the cord of choice for outdoor use in sub-zero temperatures.

Please call for availability of TPE cords requiring higher conductor counts or larger wire gauge sizes.

COMMUNICATION/ELECTRONIC CORDS - PVC 23 Gauge (In Stock) RoHS

Retracted Lengths 48", 36", 24", 12" Extended Lengths: Ratio 1:5 80deg C UL

PVC has proven over many years to be a highly suitable material in the manufacture of retractable cords based on its durability and its ability to offer good performance at reasonable cost where power requirements are low to moderate. Its glossy finish is suitable in many applications and if required it can be made in many colors other than black. Included in this group, to name just a few, are cords suited for use in test instruments, medical equipment, barcode readers, hand-held controllers and photograph equipment. PVC cords can be made to UL AWM style 2464 rated at 80 deg 300volts. Please call when there is a requirement for conductor counts other than those shown here.

Retracted Lengths 48", 36", 24", 12" Extended Lengths: Ratio 1:5 60deg C UL

This group of flame retardant cords is recognized by UL as Appliance Wire Material Styles 20197 and 20318. They offer a high degree of performance in severe duty applications and in cold environments. They are especially well suited for usage in test instruments, medical equipment, barcode readers, hand-held computers, game machines, hand-held controllers, headset communications ground to cockpit, photographic equipment and other similar applications. Similar performance is available with non-flame retardant non UL cords at reduced cost. Please call when there is a requirement for conductor counts other than those shown below.

Thermoplastic Elastomer (TPE) is a material with the look and feel of rubber making it highly suitable for use in retractable cords. It exhibits flexibility, toughness, with good high and low temperature operating characteristics, excellent resistance to water, alcohol and acids, and especially, outstanding electrical properties. They are well suited for usage in test instruments, medical equipment, barcode readers, hand-held computers, game machines, hand-held controllers, photographic equipment, industrial weighing equipment and other similar applications. Please call when there is a requirement for conductor counts other than those shown below.

Tinned Soft Copper/PP Insulated, TPE Jacketed - Black Matte Finish

Color Code - See Color Chart #1

Aluminum Mylar Shield with Drain – 100% Coverage

Options Available:

- Tinned Copper Served Shield (Spiral Wrap) – 90% Coverage – Change Suffix Letters from PA to PS
- Double Shield of Aluminum Mylar Plus Spiral Wrap - Change Suffix Letters from PA to PAS
- Other Gauge Sizes and/or Strandings Available
- Special Retracted Lengths - 120" maximum on most constructions.
- Special Tangent Leads

**Inches - Dimensions Are Nominal

Miniature Cords - PVC 28 Gauge (Made to Order) RoHS Compliant

Retracted Lengths 48", 36", 24", 12" Extended Lengths: Ratio 1:5 80deg C UL

Miniature coiled cords are versatile performers where power consumption is minimal combined with the need for light weight and flexibility. Please call when there is a requirement for conductor counts other than those shown below.

Miniature Cords - with Foil Shield -PVC 28 GAUGE (Made to Order) RoHS

Retracted Lengths 48", 36", 24", 12"Extended Lengths: Ratio 1:5 80deg C UL

Aluminum polyester foil shields with 100% coverage form an effective barrier to reduce or eliminate Electro Magnetic Interference (EMI) or Radio Frequency Interference (RFI) or Electro Static Discharge (ESD). Tinned copper served shields are also available and can be combined with foil shields for even better performance. Please call when there is a requirement for conductor counts other than those shown below.

Ordering Instructions

The following will enable us to provide you with the exact type of retractile cord or cable you require.

- Product application
- Voltage/Amperage rating of equipment
- Number of conductors required
- Gauge size
- Insulation preferred: Polypropylene (PP), Polyvinyl Chloride (PVC), Ethylene Propylene Rubber (EPR), Hytrel
- Shielding, type, capacitance
- Jacket preferred:
 1. Polyvinyl Chloride (PVC)
 2. Polyurethane (PU) or Flame-Retarded Polyurethane (FR-PU)
 3. Thermoplastic Elastomer/Rubber (TPR/TPE)
 4. Hytrel
 5. Thermoset Rubber — Available only on 18 or larger AWG sizes
- Quantities required
- Is current sample available?
- See Sketch below for additional information.
 1. "L" dimension — retracted. Use 1:5 ratio for extended length.
 2. Provide following dimensions where applicable.
 - X and Y Length of leads. Specify if natural or axial style required.
 - X1 and/or Y1 — amount of jacket removal required.
 - X2 and/or y2 — length of insulation to be removed.Specify if terminals, twisting and/or tinning required.

Insulation Compounds

60C	PolyVinyl Chloride	Rated 300 & 500	Volts/Mil
80C	PolyVinyl Chloride	Rated 500	Volts/Mil
105C	PolyVinyl Chloride	Rated 500	Volts/Mil
105C	Ethylene Propylene	Rated 600	Volts/Mil
80C	Polypropylene (PP)	Rated 600	Volts/Mil
	HytreI		

Jacket Compounds – Colors Upon Request

- 60C,80C,105C PolyVinyl Chloride (PVC)
- Polyurethanes(PU)
- 105C Thermoplastic Rubber(TPR/TPE)
- HytreI

Construction

- Single Conductor to Multi-Conductor Cables
- Served Shield
- Mylar Shield
- Braid Shield

Wire

- 30 to 14 Gauge Copper Wire, Bare or Tinned
- 30 to 14 Gauge Soft Tinned Copper

Coiling

- Most of the cable constructions listed above can be coiled (except those made with braided shields).

Applications (partial listing)

Defibrillator	Medical Electronics
TV Hand Held Camera (Coaxial)	Marine Telephones
Language Lab	Telecommunications Cords
Robotic Cords	Microphone Cords
Data Processing Printer Cords	Aircraft-Communication Head Sets
Metal Detectors(Field Hand Held Units)	Equipment Control Cords

SWC is ready to give it's customers all the technical help needed to design their cables to insure a quality product at very competitive pricing.

NOTE: Retracted lengths are approximate. Allow for shrinkage. Extended lengths are guaranteed.
